PROFILE

Enthusiastic and dedicated Full Stack Developer currently pursuing Bachelor of Computer Applications (BCA, 3rd Year) at Vidyadeep University. Certified in Full Stack Development from Red & White Skill Education. Proficient in both frontend and backend technologies with hands-on experience in creating responsive, user-friendly, and scalable applications. Passionate about problem-solving, continuous learning, and contributing to innovative development projects.

PROJECTS

- E-commerce Web Application

  - **Developed a comprehensive mini e-commerce application using modern web technologies**
    Frontend : Implemented responsive user interface with React.js for seamless user experience
    Backend: Built robust server-side architecture using Node.js and Express.js
    Database: Designed and implemented MongoDB database for efficient data management
  - **Key Features:**
    Dynamic product listing with search and filter functionality Shopping cart management system with real-time updates

- Task Managment Web Application

  - **Developed a comprehensive mini Task Managment application using modern web technologies**
    Frontend : Implemented responsive user interface with React.js for seamless user experience
    Backend: Built robust server-side architecture using Node.js and Express.js
    Database: Designed and implemented MongoDB database for efficient data management
  - **Key Features:**
    Dynamic product listing with search and filter functionality
    Secure user authentication and authorization system
    RESTful API integration for smooth data flow
  - **Technical Implementation: Utilized JavaScript ES6+ features, implemented state management in React, and created scalable database schemas**
    Impact: Successfully demonstrated full-stack development capabilities with a functional.
